SUMMARY

Experienced backend Django/Django Rest Python developer with a passion for integrating AI APIs. Proficient in building robust and scalable web applications with Django framework. Skilled in developing RESTful APIs to facilitate seamless communication between frontend and backend systems. Adept at leveraging AI technologies to enhance application functionality and user experience.

WORK EXPERIENCE

Intern Penetration Test engineer (Kcell)   Jun 2023 - Jul 2023

Conducted penetration tests for different sites

Backend Developer (Astana It Group)   Nov 2023 - Mar 2024

– Develop marketplace with fiends, like Technodom. My tasks included database design, architecture and backend development, all components were written by ourself.
– Python, Django, Django REST, Postgresql, Celery, Redis, AWS, Docker

Backend Developer (Aurora Holding)   Mar 2024 - Apr 2024

– AVH website support, bug fixes, new feature development, data analytics
– Python, Django, Django REST, Postgresql, Celery, Redis, Pandas

PROJECTS

Maqta   GitHub of project

"Maqta" is an innovative online platform designed to aid in learning the Kazakh language, inspired by the popular approach used in Duolingo. Built on the robust Django backend infrastructure, Maqta integrates advanced artificial intelligence methods to enrich the learning experience.
Stack: Python, Django, Django REST, Postgresql, Celery, Redis, AWS, Docker

SmartCook   GitHub of project

"SmartCook" is a platform where users can share and discover recipes, engage in culinary battles, and utilize an AI-powered feature to generate recipes based on selected ingredients. It fosters community interaction through recipe sharing and liking, encourages friendly competition through culinary battles, and enhances user experience with personalized recipe suggestions using AI technology.
Stack: Python, Django, Django REST, Postgresql, Celery, Redis, AWS, Docker

EDUCATION

2021 - present   Bachelor of Information Systems, **Suleyman Demirel University**

SKILLS

Technical Skills	Java, Python, Django, Django REST, Postgresql, Celery, Redis, RabbitMQ, AWS, Docker, SQL, Algorithms and Data Structures, NoSQL(MongoDB), Linux Basics, Nginx
Soft Skills	Problem-Solving, Critical Thinking, Team player, Fast Learning
